

# **Comparison of Models and Deployment** Tools

# APRENDIZAJE AUTOMATICO EMBEBIDO INGENIERIA ELECTRONICA

# Outline

- 1. Comparison of Models PyCaret
- 2. Deployment Tools

### **Comparison of models**

The function compare\_models trains all the models in the model library using default hyperparameters and evaluates performance metrics using cross validation. It returns the trained model object class. The evaluation metrics used are:

For Classification: Accuracy, AUC, Recall, Precision, F1, Kappa, MCC.

For Regression: MAE, MSE, RMSE, R2, RMSLE, MAPE.

# Outline

- 1. Model Selection PyCaret
- 2. Deployment Tools

## **Deployment Tools**

#### From Scikit-learn models:

Sklearn-porter (deprecated), micromlgen (deprecated), Eloquent – everywhereml, emLearn (keras)

#### From TensorFlow models:

Edge Impulse

Eloquent – EloquentTinyML, tinymlgen (deprecated),

# 1 Gracias!
